

Task 03: Meeting Notes Summarizer Using Prompt Engineering

Objective

To automate the process of converting meeting notes into a structured summary using an AI prompt.

Final Prompt:

You are a meeting assistant.

Your job is to convert meeting notes into a structured summary.

Extract the following information:

1. Meeting Topic
2. Key Discussion Points
3. Decisions Made
4. Action Items

Output Format:

Meeting Topic:

[Topic]

Key Discussion Points:

- Point 1
- Point 2

Decisions Made:

- Decision 1
- Decision 2

Action Items:

- Person: Task (Deadline)

If any information is missing, write "Not Mentioned".

Input 1:

The development team discussed the mobile app launch. Testing revealed minor login issues. The team decided to fix all bugs before release. Rahul will fix login bugs by June 10. Priya will prepare marketing materials by June 12.

Input 2:

HR discussed employee engagement strategies. Suggestions included team outings and monthly awards. The team approved a monthly recognition program. Anjali will create the implementation plan by Friday.

Input 3:

Sales team reviewed quarterly performance. Revenue increased by 12%. Members discussed expanding digital marketing efforts. Vikram will coordinate with the marketing department next week.

Reflection / Prompt Iteration

Initial Prompt:

The first version of the prompt only asked the AI to summarize meeting notes. However, the output format varied for different inputs, making it difficult to compare and use consistently.

Issue Identified:

- Outputs were not structured uniformly.
- Important details such as action items were sometimes missing.
- Different headings were used in different responses.

Improvements Made:

I refined the prompt by specifying exactly what information to extract (Meeting Topic, Key Discussion Points, Decisions Made, and Action Items) and provided a fixed output format.

Final Result:

The improved prompt generated clear, consistent, and well-organized summaries for different meeting notes, making it effective for task automation.
